

iCheck[®] Quantitative Strip Test System

iCheck[®] Quantitative Strip Test System is a series of products independently developed by CLOVER. It combines colloidal gold test kit with iCheck Strip Reader to realize quantitative detection technology. The method has the characteristics of simple operation, low cost and high sensitivity. The detection method has passed the ISO9001 Quality Management System Certification.

iCheck[®] Quantitative Strip Test System includes Mycotoxin Test System, Veterinary Drug Residue Test System, Heavy Metal Test System and Pesticide Residue Test System; it is widely used in traditional Chinese Medicine, Grain, Food, Feed, Nuts, Vegetable Oil, Condiments and Alcohol Samples detection. And we can provide you with better solutions according to customer needs.
